

# INSTALLATION GUIDE

- **Step 1:** Install Visual Studio Code (<https://code.visualstudio.com/>)
- **Step 2:** Install Node.js and make sure to check the box to install Chocolatey (<https://nodejs.org/en>)
- **Step 3:** Install MongoDB Community Server (<https://www.mongodb.com/try/download/community>)
- **Step 4:** Open Visual Studio Code. Go to the toolbar and select File – Open Folder, then click on JobTrak folder.
- **Step 5:** Go to the toolbar and select Terminal – New Terminal.
- **Step 6:** In the Terminal, type “**npm -f install**” in the terminal which will install all the dependencies you need to start the website.
  - **Tip:** if you run into this error:

```
npm : File C:\Program Files\nodejs\npm.ps1 cannot be loaded because running scripts is disabled on this system. For more information, see
about_Execution_Policies at https://go.microsoft.com/fwlink/?LinkID=135170.
At line:1 char:1
+ npm install
+ ~~~~~
+ CategoryInfo          : SecurityError: (:) [], PSSecurityException
+ FullyQualifiedErrorId : UnauthorizedAccess
```

Run Powershell as administrator and run the following:

**PS C:\> Set-ExecutionPolicy RemoteSigned**

and Yes to all with “A”.

- **Step 7:** after installing all the dependencies, type “**npm start**” in the terminal to start to website.
